Summary

- Aspiring Data Analyst with hands-on experience in data cleaning, analysis, and visualization using **Power BI, SQL, Python, and Excel**. Skilled in transforming raw data into actionable insights through interactive dashboards, reports, and analytical models. Passionate about leveraging data to support business decisions, identify trends, and drive measurable outcomes.

Functional Areas

- | | | |
|------------------|------------------------|----------------------------|
| • Data cleaning | • Data visualization | • Business Intelligence |
| • Data modelling | • Reporting automation | Reporting and Dashboarding |

Technical Skills

- Power BI** - Power Query, DAX, M language, Power BI service, Extract Transform and Load (ETL), Reports and Dashboards.
- SQL** - DDL, DML, Joins, CTEs, Sub-queries, Window functions, SQL server, MySQL, Stored Procedures, Views
- MS-Excel** - Pivot tables, Pivot charts, Lookups, Power Query, Major Excel functions, Excel Dashboards, VBA Macros, Dynamic Data Collection, Automated Reporting, Draw Line Functions
- Others** - Tableau, Python, Word, PowerPoint, Google sheets, Google docs

Projects

Student Feedback Analysis & Sentiment Insights for College Events [\[Link\]](#)

Description – Analyzed student feedback data from college events using Python to identify satisfaction trends and sentiment patterns, enabling actionable recommendations for improving future events.

Tools used – Python, Pandas & NumPy, Matplotlib & Seaborn, TextBlob (NLP).

Superstore Sales Performance Dashboard (Power BI) [\[Link\]](#)

Description – Built an interactive Power BI dashboard to analyze superstore sales, profit, and customer trends across regions, categories, and time, enabling data-driven business insights.

Tools used – Power BI, DAX, Data Visualization.

Multi-Channel Marketing Performance & ROI Analysis Dashboard [\[Link\]](#)

Description – Developed an interactive Power BI dashboard to evaluate multi-channel advertising spend, revenue, and ROI, enabling optimization of marketing investments across channels.

Tools used – Power BI, DAX, Data Visualization

Dynamic Data Collector (MS Excel)

Description – Built a dynamic data collection system in Excel using VBA macros and advanced formulas to automate data entry, input validation, and structured storage, eliminating repetitive manual tasks and improving data accuracy.

Tools used – MS Excel, VBA, Advanced Excel Functions.

Automatic Mail Sender (MS Excel)

Description – Developed a VBA-powered email automation tool in Excel that reads recipient data from a spreadsheet and sends customized emails automatically, streamlining bulk communication workflows without leaving Excel.

Tools used – MS Excel, VBA, Outlook Integration.

Star & Delta Connection Diagrams (MS Excel)

Description – Created precise technical electrical diagrams illustrating Star and Delta motor connection configurations using Excel's Draw Line function, showcasing creative and cross-domain application of spreadsheet tooling beyond data analysis.

Tools used – MS Excel, Draw Line Function, Shapes & Connectors.

Internship

Data Analyst

11/2025 – 12/2025

Future Interns, Remote

Tools used – Power BI, DAX, Python, Pandas & NumPy

Excel & Power BI Analyst Intern

02/2026 – 07/2026

Alleima, Pune

- Designed a Dynamic Data Collector in Excel using VBA macros and advanced formulas to automate data entry, validation, and storage workflows, significantly reducing manual effort.
- Built an Automatic Mail Sender in Excel using VBA to trigger and send customized emails directly from spreadsheets, automating communication workflows.
- Created technical electrical diagrams (Star and Delta connections) using Excel's Draw Line function, demonstrating cross-domain application of Excel tooling.
- Built professional and interactive Power BI dashboards to visualize key business metrics, enabling data-driven decision-making for stakeholders.

Tools used – MS Excel, VBA, Power BI, DAX, Power Query

Education

Bachelor of Technology – Computer Science and Engineering

09/2022 – 05/2026

CGPA – 7.85/10 | First Class

MIT ADT University – Pune, Maharashtra

AI Career Accelerator – BE10X

06/2025 – 01/2026

- Learning various tools and languages through AI, such as Python, SQL and many more.
- Getting exposed to how to use AI efficiently for my future career and my daily life.
- Helping myself get job and corporate ready, to apply all of the learnings from this course.
- Learning Microsoft affiliated and certified courses.
